EUROPEAN CHAMPIONSHIPS 2018:

LEARNING & TEACHING SUGGESTIONS

Curriculum Area	**Developing the Young Workforce (DYW)**
Curriculum Focus	Other than athletes, which jobs are available linked to sport? What skills are needed for these jobs? How might you show that you had these skills?
Why don't you….?	• Have a look at the sports which are involved in the European Championships. Apart from the athletes, make a list of other jobs which need to be done to support the competition. – see how many you can come up with! Here are a few examples to start you off: Sports commentator; events manager; greenkeeper; poolside attendant. • Now choose some of the jobs you have identified and for each one, produce a job description for the job and state the skills someone would need to be successful in getting that job. • Now choose one of the jobs you have identified and either: write an application for this job or carry out an interview for this job. One person will think of questions to ask at the interview and the other will give answers – hopefully getting the job!

Now tell us…..	Use the hashtag #EdScotEuroChamps to tell us about what you've been doing. Let us know: • Did you try any of these ideas out with pupils? • If so, what went well? • What other European Championship-linked activities did you engage in today?
