ASN Transitions and COVID 19
Supporting children, young people who require additional support, their families and practitioners

ASN Transitions during COVID 19 Pandemic Phases: Emerging practice and resources

For Scotland's learners, with Scotland's educators
**Additional Support Needs (ASN) Transitions during COVID-19 Pandemic Phases: Emerging practice & resources**

**Background:** [Code of Practice](#)

“Some changes in school education may involve irregular transition experiences …..Where these involve a child or young person with ASN, the education authority and other agencies should take account of the way these changes affect the provision of the ASN required by the child or the young person.” (p95, Code of Practice, 2017). The current COVID-19 pandemic has ensured that all children including those with ASN have been involved in irregular transition experiences. Therefore, we need to consider how these changes have affected children and young people with ASN and what we can do to mitigate any negative impact.

**Guiding components from the Code of Practice to ensure effective transitions:**

- Co-ordinated by one person who is familiar to the child and young person and family
- Views of the child, young person and parents are vital
- Effective planning with a shared understanding and close communication amongst all relevant persons
- Multi-agency (when appropriate)
- Advice and information are needed where it helps establish a child’s ASN and the provision of ASN required
- Can involve a range of strategies
- Make appropriate arrangements to ensure transition is as smooth as possible.

The Code of Practice also states that Education authorities have some discretion about to whom these transition duties apply under the Act. The reason being that it “may be unnecessary to apply these duties and arrangements to every child and young person with ASN given that some additional support needs may be transitory and/ or relatively minor.” (p97).

In these unprecedented circumstances, when timelines around transitions are evolving and/ or unknown, it is still important for us consider how these transitions are, can and will impact on children and young people with ASN and what we can do to make these transitions as smooth as possible for them. There is no blueprint for how this can be achieved but it is important for us to know that we have many of the skills and resources available already, but we might just have to use them in different ways.

**This resource aims to:**

- Highlight issues identified as significant for those with additional support needs at different stages of the pandemic,
- Link practitioners to supporting resources or existing examples of emerging and promising practice.

**This resource is not intended to be an exhaustive list of the issues being identified by children and young people, parents, practitioners and partners but is a summary of some of the main concerns (see Appendix 1 for source information).**

| Unfamiliar people and environments       | Scottish Autism’s [poster](#) on learning at school.  
Also see ‘Supporting understanding of COVID 19 Changes’ section above. |
| Maintaining emotional connections        | Examples of support:  
Stirling: Castleview School and Millhall are delivering free school meals to all their learners so they can maintain their emotional connection. Millhall are also regularly telephoning parents, sending out learning packs such as sports packs for regulatory activities and doing Easter egg drops, football drops and a sunflower seed competition. Castleview have their own YouTube channel which has lessons for their children including music, STEM lessons such as making your own lava lamp, etc. It also includes routines children are familiar with such as their good morning song and assemblies. The school are also setting weekly challenges and feeding back through YouTube.  
South Ayrshire: Invergarven School – [video](#) showing all staff with messages for the children on ‘Staying Amazing, and Staying You’  
Glasgow: **Reconnection to school and nursery** – Nurture principles applied to their COVID 19 response and transitions.  
[Reach – Getting Help with relationships](#) (for pupils) |
| Interrupted transition programmes        | [SEIC Resource](#) - Use of digital methods to support transition  
Communication friendly and editable [Transition Booklets](#)  
Allans PS (Stirling) publish a transition [newsletter](#) for parents and new children P1. Their next newsletter identified P6 Big Buddies for their P1 pupils and each child received a different newsletter which included a video from their own P6 buddy.  
Arc Scotland: [Parents and Carers Network](#) (specifically for those young people leaving school or college. |
| Children’s concerns about their school and/ or associated people from school | Examples of support:  
A child with ASD was concerned about the class mascot, so the school’s Family Link Worker sent regular weekly updates on what the mascot was doing during lockdown. |
Some learners with ASN were concerned about their school and so their HT did a virtual tour of the school and posted it on Twitter to reassure learners. Glasgow: **Reconnection to school and nursery** – Nurture principles applied to their COVID 19 response and transitions.

### Medium Term: Preparing to return to school
