

My Primary 7 Profile

By Learner 2

Health and Well Being

I know how to keep myself safe when crossing a road and lots of different facts about road safety. I know it is important to keep fit by eating a healthy diet and by playing lots of different sports like football, golf and table tennis, hockey, netball, fitness and rugby. It is important to keep fit because it is good for my health now and in the future. I like P.E and this is probably my best subject as I am skilled in most areas. I have taken part in lots of after school clubs like badminton, football and netball. Each club helped me improve my knowledge and skill in that area and build my confidence and team sports help us work together. I have also learned about the dangers of drugs and alcohol, this knowledge will help me with my life skills. I know it is important to have good relationships with others but also be able to make your own decisions in life and show that you are responsible and confident in making the right choices. I have discussed my achievements and attainment in this area with my teacher and I am consolidating at 2nd level.

Literacy and English

I love story writing and I am good at using my imagination. I use VCOP skills and strategies to improve my writing skills and I can write in different styles to suit the purpose of the writing. This is important as we write for all areas of the curriculum. I enjoy going outside to do active spelling because it makes it a more enjoyable way to learn. I enjoy reading real life novels that I can relate to. I can use question fans to create a variety questions about a text for my partner to answer-this is important because it shows I understand what I have read. I am a good listener and can respond responsibly to others' opinions. I am a confident talker and have presented group, class and whole school presentations helping me be a successful learner and confident individual. I have discussed my progress with my teacher and I am currently consolidating at second level.

Numeracy and Mathematics

Numeracy and mathematics is one of my favourite subjects. I can use fractions, times tables and percentages confidently and this helps me when answering a range of questions, it also helps me to understand and interpret graphs and charts in other areas such as Science. I can work accurately with large numbers mentally and through written methods. I enjoy decimals and algebra because they are logical and algebra is different to anything I have done before, making it a challenge. I can use money in written sums and in real life situations-thinking about profit and loss and how to stick to a budget. I also know how to use grams and kilograms, m, cm and mm and this will help me in real life situations and in other areas, such as using precise measurements in technology. I have discussed my progress with my teacher and I am currently consolidating at second level.

Learning and Achievements – my statement!

I am a kinaesthetic learner so I prefer to write things down and to be active during my learning. I find that listening to music while working is effective because it helps me to concentrate. This year I was lucky enough to be voted as a vice captain; this involves picking people to take part in competitions during the year and sports day activities like tug of war and my favourite-football. I have to choose responsible team members and we have to work as a team to win! I am also a member of the Eco committee and we are working towards our third green flag. I have presented information at whole school assemblies, helping my confidence and communication skills. I have received school certificates for being a responsible learner and taking part in our Scottish Celebration. My peers awarded me a certificate for being a successful learner. Other achievements include 7 football trophies, 5 football medals, a golf trophy and 2 judo trophies. As you can see, I'm skilled at P.E! - I love all sports and enjoy learning new skills and playing as part of a team. These skills will help me in the future when I achieve my goals of becoming either a policeman or footballer. For both these careers you have to work well with others. Last year I took part in a residential trip to Hexham. We did a team challenge where we had to work in groups of 5. We used our team skills to complete the course. We had to encourage and help each other throughout it, listening carefully to each other and giving clear instructions-it was great fun. An important lesson I learnt from Hexham was that things aren't always as hard as they seem, and sometimes you just need to give things a go and be up for a challenge. I hope this attitude will help me in the future.

Skills across the Curriculum

I enjoy group work and partner work. This has made me more confident when speaking aloud and I have become a more confident pupil. I can't wait to go to Secondary School and get double periods of P.E because this is my favourite subject. I think it's important to learn about the past as it helps us understand where we came from and should stop people making the same mistakes. I am enjoying our world war two topic. It has been my favourite topic ever because I find learning about the artillery interesting and enjoy the drama aspect of the topic where we pretend we are evacuees and have to take part in gas masks drills using our home made gas masks. I find it important to learn about different religions because it helps me to understand people's beliefs. As a practical learner I find Science an interesting challenge – learning about the world around us and thinking about how we can make the world a better place. Technology and ICT skills are useful in all areas of the curriculum and it is important to be able to use our skills to support our learning in all areas. I have discussed my progress with my teacher and I am currently consolidating at second level.

Parent Comment:

C..... is a sensible, confident hard working boy with a great sense of humour. He can competently identify his strengths and progress and knows the importance of education in his overall development. He is friendly and popular. We are very proud of him and his achievements.
