

BHC Building Merchants

Work Placement and Work-Related Learning

The company are supplying the school with materials, attending the S3/S4 career day, supporting the S6 expedition trip to Peru as well as taking on pupils from the school as apprentices.

BHC are very enthusiastic to enter into a business partnership with the school, as they see it as one of the ways in which they can deal with an ever increasing skills shortage. A staff visit to the site facilitated discussion on the huge array of jobs and potential career opportunities the organisation offers from engineering to office/clerical work.

Areas of the curriculum were identified that would be most suited to developing the skills that BHC are looking for, the discussion also revolved on how the expertise within the company could be used to adjust/focus/enhance areas of subject courses. The company has agreed to provide placements for work experience; focussed class visits; potential apprenticeship opportunities.

BHC are very keen to let pupils know that there are real opportunities available within their organisation and they are keen to employ local people, train and support them in their career aspirations.
